FINCIBEC

GROUP

Fincibec Group is known worldwide for the excellence of its ceramic surfaces, which reflect the absolute quality of a production process that uses the best technologies in the industry.
The wide choice of material effects is available in an unrivalled range of sizes, from small, trendy formats to large porcelain stoneware slabs.

The Fincibec Group range is constantly evolving to meet the inspirations and needs of the interior design, architecture and residential sectors.

Fincibec Group è conosciuto in tutto il mondo per l'eccellenza delle proprie superfici ceramiche, espressione dell'assoluta qualità di un processo produttivo che utilizza le migliori tecnologie del settore. L'ampia scelta di suggestioni materiche è declinata in una gamma formati impareggiabile che spazia dai piccoli formati di tendenza fino alle grandi lastre in gres porcellanato.

La gamma Fincibec Group è in continua evoluzione per assecondare ispirazioni e necessità del mondo dell'interior, dell'architettura e del residenziale.

Moodboard interprets design as an exercise in connection. An essential architectural language that is never uniform, where detail brings rhythm to the surface and material becomes an active part of the design. Compact surfaces, aggregate textures and mineral inclusions create a palette conceived to be combined according to the character of each space.

Moodboard interpreta il progetto come un esercizio di relazione. Un linguaggio architettonico essenziale ma mai uniforme, in cui il dettaglio dà ritmo alla superficie e la materia diventa parte attiva del progetto. Superfici compatte, texture aggregate e frammenti minerali costruiscono una palette pensata per essere composta secondo il carattere dello spazio.

Moodboard — collection

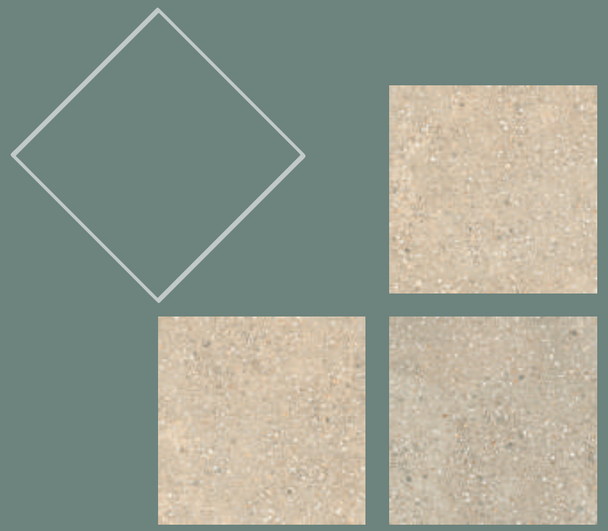

INSPIRATION

Inspired by the design process of selecting and combining elements, Moodboard transforms texture, colour and detail into tools for shaping contemporary spaces that are both rigorous and welcoming. Uniform backgrounds and surfaces enriched with textural inclusions come together in a system of measured contrasts, designed to create rhythm, depth and continuity throughout the space. The precision of solid fields interacts with the irregularity of the pebble-like texture, while an essential palette of neutral tones allows each element to stand alone or engage in dialogue with the others.

Ispirata al gesto progettuale della selezione e dell'accostamento, Moodboard trasforma texture, colore e dettaglio in strumenti per definire ambienti contemporanei, rigorosi e accoglienti. Fondi uniformi e superfici attraversate da inclusioni materiche si incontrano in un sistema di contrasti misurati, pensato per costruire ritmo, profondità e continuità negli spazi. La precisione delle campiture dialoga con l'irregolarità del ciottolato, mentre una palette essenziale di toni neutri permette a ogni elemento di vivere da solo o in relazione con gli altri.

MATTER IN COMPOSITION

COLOUR BECOMES A DESIGN TOOL

A carefully balanced palette gives designers the freedom to create combinations, contrasts and colour continuity. Each shade can stand as an individual surface or interact with the others, becoming a compositional tool for defining volumes, rhythms and hierarchies within the space.

Una palette calibrata offre al progettista la libertà di costruire accostamenti, contrasti e continuità cromatiche. Ogni tonalità può vivere come superficie autonoma o dialogare con le altre, diventando uno strumento compositivo per definire volumi, ritmi e gerarchie all'interno dello spazio.

BUILT ON RESPONSIBLE CHOICES

Product Certification
BUREAU VERITAS
Certification

Sustainability is an integral part of the Fincibec Group's production process. Through the recovery of internal raw waste and the utilisation of by-products from selected external supply chains, the circular economy becomes a concrete, day-to-day practice. The constant optimisation of mixtures and rigorous management of residues enable resources to be reintegrated into the production cycle, reducing waste and improving the efficiency of raw material use. This approach yields a measurable result: the range is certified by Bureau Veritas as containing 56 per cent pre-consumer recycled material. Aesthetics, technical performance and environmental responsibility thus become verifiable values that underpin a more conscious approach to design.

La sostenibilità è parte integrante del processo produttivo di Fincibec Group. Attraverso il recupero degli scarti crudi interni e la valorizzazione di sottoprodotti provenienti da filiere esterne selezionate, l'economia circolare diventa una pratica concreta e quotidiana.
La costante ottimizzazione degli impasti e la gestione rigorosa dei residui permettono di reintegrare risorse nel ciclo produttivo, riducendo gli sprechi e migliorando l'efficienza nell'uso delle materie prime.
Questo approccio porta a un risultato misurabile: la serie è certificata da Bureau Veritas per un contenuto del 56% di materiale riciclato pre-consumer.
Estetica, prestazioni tecniche e responsabilità ambientale diventano così valori verificabili al servizio di una progettualità più consapevole.

REAL®
EFFECT
technology
by Fincibec

Real Effect is Fincibec Group technology that takes porcelain stoneware to a new level of visual and tactile realism. High-definition digital graphics and surface structure work together to create surfaces with depth and consistency, closely reflecting the material that inspired them.

Real Effect è la tecnologia Fincibec Group che porta il gres porcellanato a un nuovo livello di realismo visivo e tattile. Grafica digitale ad alta definizione e struttura superficiale lavorano insieme per creare superfici profonde, coerenti e vicine alla materia d’ispirazione.

A balance between sensory quality and technical performance. Natural Evolution technology enhances Moodboard's material character, emphasising the colour continuity of its backgrounds while combining a pleasantly soft feel with good slip resistance.

Un equilibrio tra qualità percettiva e prestazioni tecniche. La tecnologia Natural Evolution valorizza il linguaggio materico di Moodboard, esaltando la continuità cromatica dei fondi e combinando una piacevole morbidezza al tatto con una buona resistenza allo scivolamento.

COLOURS IN DIALOGUE

A coordinated palette allows monochromatic or contrasting combinations to be developed, bringing surfaces, volumes and details into dialogue with one another. Colour thus becomes a design tool that creates continuity throughout the interiors, enhances the architecture and defines a coherent style across every element of the space.

Una palette coordinata permette di sviluppare combinazioni monocromatiche o a contrasto, costruendo superfici, volumi e dettagli in relazione tra loro. Il colore diventa così uno strumento progettuale capace di dare continuità agli ambienti, valorizzare l'architettura e definire uno stile coerente in ogni elemento dello spazio.

Moodboard — collection

Durable and versatile, the collection is designed for floors and walls in residential, commercial and public spaces. The result is a realistic, design-flexible finish that lends itself to monochromatic or contrasting combinations, creating continuous surfaces, volumes and material relationships within the architecture.

Resistente e versatile, la collezione è pensata per pavimenti e rivestimenti in spazi residenziali, commerciali e pubblici. Il risultato è una finitura realistica e progettualmente flessibile, capace di accompagnare combinazioni monocromatiche o a contrasto e di costruire superfici continue, volumi e relazioni materiche all’interno dell’architettura.

Use classes / Categorie d'impiego

C1 **Floor tiles recommended for low traffic areas**
Piastrelle da pavimento consigliate per calpestio lieve

C2 **Floor tiles recommended for light traffic areas**
Piastrelle da pavimento consigliate per calpestio leggero

C3 **Floor tiles recommended for medium-light traffic areas**
Piastrelle da pavimento consigliate per calpestio medio leggero

120x278

C4 **Floor tiles recommended for medium traffic areas**
Piastrelle da pavimento consigliate per calpestio medio

Natural evolution/Grip

C5 **Floor tiles suitable for heavy traffic**
Piastrelle da pavimento consigliate per calpestio intenso

Use / Utilizzo

Tiles for walls
Piastrelle per rivestimento pareti

Tiles for floors
Piastrelle per rivestimento pavimenti
