FINCIBEC GROUP

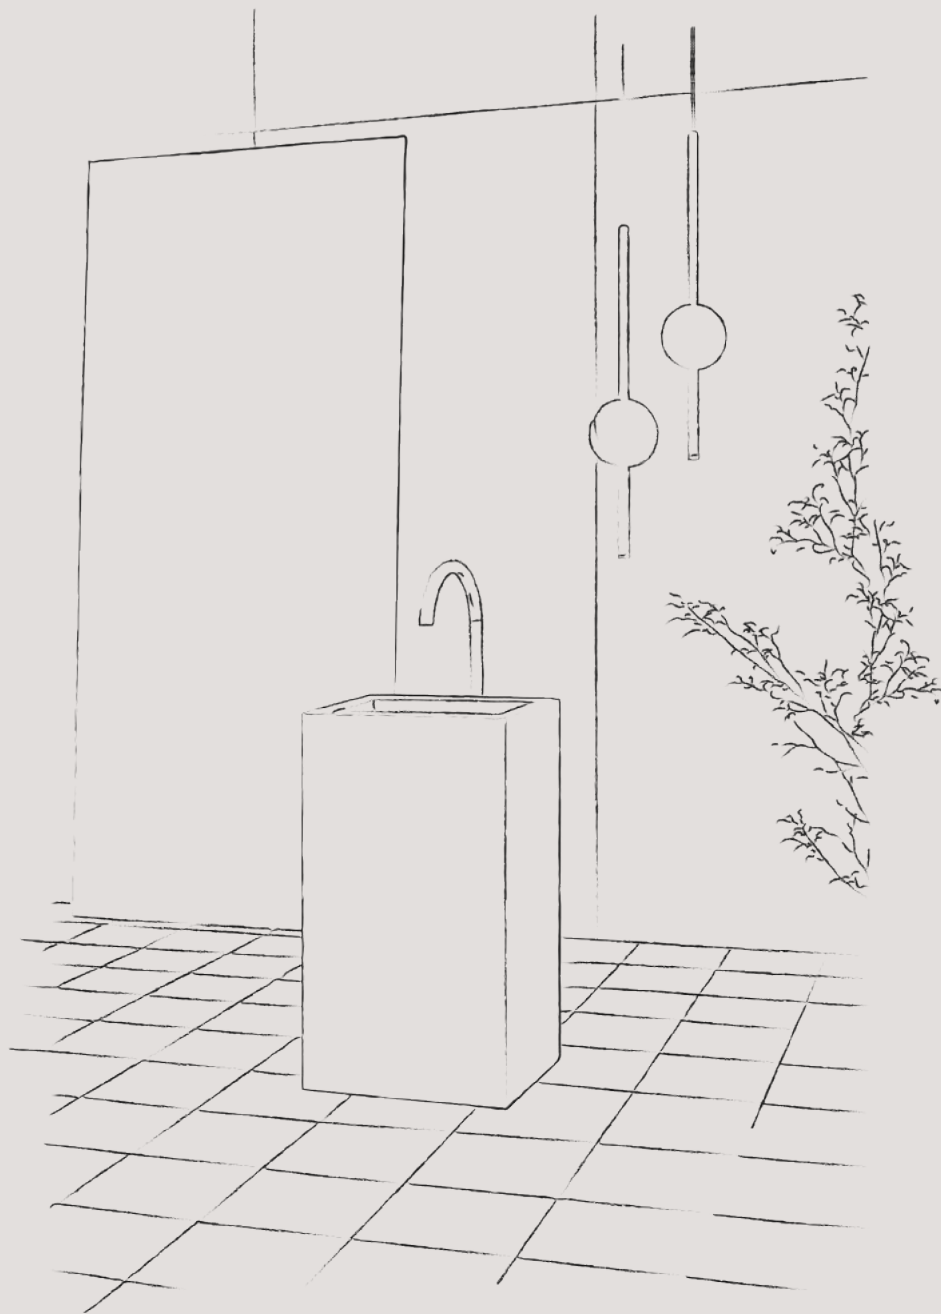

Fincibec Group is known worldwide for the excellence of its ceramic surfaces, which reflect the absolute quality of a production process that uses the best technologies in the industry. The wide choice of material effects is available in an unrivalled range of sizes, from small, trendy formats to large porcelain stoneware slabs.

The Fincibec Group range is constantly evolving to meet the inspirations and needs of the interior design, architecture and residential sectors.

Fincibec Group è conosciuto in tutto il mondo per l'eccellenza delle proprie superfici ceramiche, espressione dell'assoluta qualità di un processo produttivo che utilizza le migliori tecnologie del settore. L'ampia scelta di suggestioni materiche è declinata in una gamma formati impareggiabile che spazia dai piccoli formati di tendenza fino alle grandi lastre in gres porcellanato.

La gamma Fincibec Group è in continua evoluzione per assecondare ispirazioni e necessità del mondo dell'interior, dell'architettura e del residenziale.

MIND*spaces*

S T Y L E S H A P I N G

DESIGNED TO BE *yours*

Mind Spaces is the natural continuation of the story of Mind, the collection of decorative surfaces and tools by Naxos. A narrative of different materials that interact with each other, generating a visual language between creativity and design. A coordinated project that combines coverings, matching tools, washbasins and furnishing accessories to create continuity across the different spaces of the home, from bathroom to the living area. Mind Spaces offers the possibility to dress your spaces with an alternation of silky, elegant and minimal colours, combined with decorations of strong personality. Elegance with that extra touch.

Mind Spaces è il naturale proseguo della storia di Mind, la collezione di superfici decorative e tools Naxos. Un racconto di materie diverse che dialogano tra loro generando un lessico visivo tra creatività e design. Un progetto coordinato che unisce rivestimenti, tools in abbinamento, lavabi e complementi d'arredo per dare continuità ai diversi ambienti della casa, dal bagno al living. Mind Spaces offre la possibilità di vestire i propri spazi con un'alternanza di colori setosi, eleganti e minimal, abbinati a decori dalla forte personalità. L'eleganza con quel tocco in più.

From matter to volume. Mind Spaces is the ideal tool for designing coordinated elements with the same surface identity: from wall coverings to washbasins, from backsplash to kitchen top, right through to furnishing accessories, a single language for your spaces.

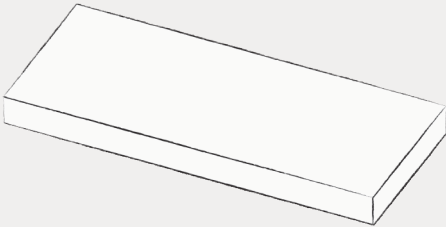

Dalla materia al volume. Mind Spaces è lo strumento ideale per progettare elementi coordinati, con la stessa identità materica: dai rivestimenti ai lavabi, dai backsplash ai piani cucina, fino ai complementi d'arredo, un unico linguaggio per i tuoi spazi.

SO THIN, SO *innovative*

THE STRENGTH OF PORCELAIN STONEWARE AT JUST 7 MM THICKNESS

The 7 mm thickness is designed for more efficient use of porcelain stoneware surfaces.

Lighter and easier to handle slabs simplify installation, both in new constructions and renovations.

The reduction in mass optimises the use of resources and the impact of processing and transport, without compromising the technical performance of the material.

The slim profile also enhances the aesthetic appeal of the details, creating a perfect balance between technology and design.

LA FORZA DEL GRES PORCELLANATO IN SOLI 7 MM

Lo spessore di 7 mm è pensato per un impiego più efficiente delle superfici in gres porcellanato.

Lastre più leggere e maneggevoli semplificano la posa, sia nelle nuove realizzazioni che nelle ristrutturazioni.

La riduzione di massa ottimizza l'impiego delle risorse e l'impatto di lavorazione e trasporto, senza rinunciare alle prestazioni tecniche del materiale.

Il profilo sottile, inoltre, valorizza la resa estetica dei dettagli, definendo un perfetto equilibrio tra tecnologia e design.

ONE LANGUAGE, MULTIPLE *spaces*

Mind Spaces creates dialogue between different areas of the same space through a shared palette, striking a perfect balance between minimal surfaces and decorations. Colours and patterns allow you to experiment with a wide range of combinations, ensuring visual harmony that brings out the character of every room, from the bathroom to the kitchen. A unique aesthetic language to create a personalised, consistent and seamless total look.

Mind Spaces fa dialogare ambienti diversi dello stesso spazio, attraverso una palette condivisa, trovando un equilibrio perfetto tra superfici minimali e decori. Colori e pattern permettono di sperimentare un'ampia gamma di match, garantendo un'armonia visiva capace di tirar fuori il carattere da ogni ambiente, dal bagno alla cucina. Un linguaggio estetico unico per dare vita a un total look personale, coerente e senza interruzioni.

Delicate nuances and decorations come together to define the identity of the space. The graphics define the character of the composition, while the more essential surfaces offer that neutral harmony upon which the design is built. The collection thus becomes a valuable tool for designing different, elegant and coherent spaces, each with its own personality.

Nuance delicate e decori si affiancano per creare l'identità dello spazio. Le grafiche definiscono il carattere della composizione, mentre le superfici più essenziali offrono quell'armonia neutra su cui costruire il progetto. La collezione diventa così uno strumento prezioso per progettare ambienti differenti, eleganti e coerenti, ognuno con una propria personalità.

WARNINGS / AVVERTENZE

To avoid chipping or irreversible damage, please do not subject the item to accidental impacts. If breakages occur, check the integrity of the structure and, if compromised, remove the item from service. Please do not misuse the product or its components. Some detachable parts may be dangerous if used as blunt instruments. Be careful of sharp surfaces and edges. Per evitare di causare sbecchature o danni irreversibili, si prega di non sottoporre l'articolo a urti accidentali. Qualora si manifestassero delle rotture, verificare l'integrità della struttura e, se compromessa, mettere l'oggetto fuori servizio. Si invita a non fare un uso improprio del prodotto e delle sue componenti. Alcune parti separabili possono costituire un pericolo se utilizzate come corpi contundenti. Fare attenzione alla presenza di superfici taglienti e a spigoli vivi.

CLEANING AND CARE

Technical Guide to Surface Maintenance

1. Porcelain Stoneware
Porcelain stoneware is a material with high physical and mechanical performance. Its surface is completely non-porous thanks to the high-temperature production process. This characteristic prevents the proliferation of mould and bacteria, making sanitisation extremely simple.

Routine cleaning: For daily maintenance, simply use a sponge or microfibre cloth dampened with warm water and a neutral detergent. Recommended products include Ultracare Multicleaner by Mapei, Faber Clean Universal, Fila Clean& Shine (IT market), Fila Cleanall (USA market) or Fila Brio (other markets). The procedure should be completed by drying with a soft cloth. For dirt that accumulates in corners, the use of a soft, non-abrasive bristle brush is recommended.

Limitations: The use of wax-based products, revivers or polishing products is prohibited, as is hydrofluoric acid and its derivatives. Metal scouring pads or excessively abrasive materials must not be used. Please note that porcelain stoneware does not require the application of wax, even in the case of glossy or lapped finishes.

Deep cleaning
In the case of stubborn stains that cannot be removed with routine cleaning, targeted detergents should be used:

Organic stains (coffee, juices, ink, etc.): alkaline-based detergents such as Faber Clean Degreaser, Fila Powerclean and Fila Hobby (other markets).

Limescale residues or oxidation (rust): acid-based detergents such as Faber Clean Limescale, Faber Tile Cleaner, Fila Deepclean (IT market) or Fila Via Bagno (other markets).

Silicone residues: specific sealant removal products such as Faber Epoxy Cleaner or Fila Zerosil.

2. Stainless Steel Surfaces
Stainless steel is a material resistant to oxidation, but specific cleaning products must be used to preserve its appearance.

Precautions: To avoid irreversible damage, abrasive sponges or metal scouring pads must not be used as they may scratch the surface.

Prohibited substances: The use of aggressive chemical substances, ammonia-based detergents, bleach or chlorine is prohibited.

3. Lacquered Surfaces
Maintaining lacquered surfaces requires careful maintenance based on the following parameters:

1. Promptness: Any stains must be removed immediately to minimise the time they remain in contact with the surface.

2. Materials: Only damp microfibre cloths should be used, preferably white to avoid pigment transfer. The use of sponges that could cause scratches is prohibited.

3. Recommended detergents: A solution of non-abrasive neutral liquid soap is recommended. Marseille soap diluted in lukewarm water is particularly suitable.

4. Drying: After rinsing, the surface should be dried promptly with a dry cloth. Natural air drying must be avoided to prevent streaks or limescale marks.

5. Prohibited substances: The use of organic solvents (acetone, alcohol), detergents containing strong acids, ammonia, trichloroethylene, bleach or universal kitchen degreasers is not permitted.

Guida Tecnica alla Manutenzione delle Superfici

1. Gres Porcellanato
Il gres porcellanato è un materiale dalle elevate prestazioni fisico-meccaniche, la cui superficie è totalmente priva di porosità grazie al processo di produzione ad altissime temperature. Tale caratteristica impedisce la proliferazione di muffe e batteri, rendendo igienizzazione estremamente semplice.

Pulizia Ordinaria: Per la manutenzione quotidiana è sufficiente l'impiego di una spugna o un panno in microfibra inumidito con acqua calda e un detergente neutro. Si consiglia l'utilizzo di prodotti quali Ultracare Multicleaner di Mapei, Faber Clean Universal, Fila Clean& Shine (per il mercato IT), Fila Cleanall (per il mercato USA) o Fila Brio (altri mercati). L'operazione deve concludersi con l'asciugatura tramite un panno morbido. Per lo sporco accumulato negli angoli, è indicato l'uso di uno spazzolino a setole morbide non abrasive.

Limitazioni: È vietato l'uso di prodotti ceranti, ravvivanti o brillantanti, così come l'acido fluoridrico e i suoi derivati. Non devono essere impiegate pagliette metalliche o materiali eccessivamente abrasivi. Si specifica che il gres porcellanato non richiede l'applicazione di cere, anche in presenza di finiture lucide o lappate.

Pulizia Straordinaria
In caso di macchie ostinate non rimovibili con la pulizia ordinaria, è necessario intervenire con detergenti mirati:

Macchie organiche (caffè, succhi, inchiostro, ecc.): Detergenti a base alcalina come Faber Clean Degreaser , Fila Powerclean e Fila Hobby per altri mercati.

Residui calcarei o ossidazione (ruggine): Detergenti a base acida come Faber Clean Limescale, Faber Tile Cleaner, Fila Deepclean (per il mercato IT) o Fila Via Bagno (altri mercati).

Residui siliconici: Prodotti specifici per la rimozione di sigillanti quali Faber Epoxy Cleaner o Fila Zerosil.

2. Superfici in Acciaio Inox
L'acciaio inox è un materiale resistente all'ossidazione, ma richiede l'adozione di detergenti specifici per preservarne l'integrità estetica.

Precauzioni: Per evitare danni irreversibili, non devono essere utilizzate spugne abrasive o pagliette metalliche che potrebbero graffiare la superficie.

Sostanze vietate: È proibito l'impiego di sostanze chimiche aggressive, detergenti a base di ammoniaca, candeggina o cloro.

3. Superfici Laccate
La conservazione delle superfici laccate richiede una manutenzione rigorosa basata sui seguenti parametri:

1. Tempestività: La rimozione di eventuali macchie deve avvenire immediatamente per minimizzare il tempo di contatto con la superficie.

2. Strumentazione: L'uso deve essere limitato a panni in microfibra inumiditi, preferibilmente di colore bianco per evitare trasferimenti di pigmento. È vietato l'impiego di spugne che possano causare graffi.

3. Detergenti indicati: È prescritta una soluzione di sapone liquido neutro non abrasivo. Risulta particolarmente indicato il Sapone di Marsiglia, da utilizzare diluito in acqua tiepida.

4. Asciugatura: Dopo il risciacquo, occorre procedere a un'asciugatura rapida con un panno asciutto. L'asciugatura naturale all'aria deve essere evitata per prevenire la formazione di aloni o tracce calcaree.

5. Sostanze vietate: Non è consentito l'uso di solventi organici (acetone, alcol), detergenti contenenti acidi forti, ammoniaca, trielina, candeggina o sgrassatori universali per cucina.

100% CERAMICS OF ITALY

These logos demonstrate a precise geographical location of origin and a way of running a business enterprise with the highest ethical and cultural values. The products made by Naxos are wholly designed, developed and manufactured in Italy. Each collection is designed and checked in the group's R&D laboratories and all the subsequent production stages are carried out exclusively in Italian facilities with Italian technology. By using the above mentioned logos, the aim of Naxos is to identify a work philosophy which, with the utmost respect for the environment and man, leads to the production of materials adhering to the highest standards of performance and aesthetics through the best use of all the resources available. Naxos adheres to the 'Made in Italy' code of ethics promoted by the Italian industrial ceramics association, 'Confindustria Ceramica', and is committed to full transparency on the origin of its products market with the brand.

Questi loghi testimoniano una precisa indicazione geografica di provenienza ed un modo di fare impresa legato ai più alti valori etici e culturali. I prodotti realizzati da Naxos sono completamente ideati, studiati e fabbricati in Italia. Ogni collezione viene progettata e verificata nei laboratori di ricerca e sviluppo del gruppo e tutte le successive fasi produttive sono realizzate esclusivamente all'interno di stabilimenti italiani con tecnologia italiana. Naxos vuole identificare una filosofia di lavoro che, nel massimo rispetto dell'ambiente e dell'uomo, porti alla realizzazione di materiali secondo i più elevati standards prestazionali ed estetici attraverso l'ottimizzazione di tutte le risorse impiegate. Naxos aderisce al codice etico sul Made in Italy promosso da Confindustria Ceramica con il quale tutte le aziende aderenti si impegnano alla massima trasparenza riguardo l'origine dei prodotti apponendovi il marchio.
