CERSAIE 2026

LA MATERIA NON RIVESTE. RIVELA.

MATTER DOES NOT COVER. IT REVEALS.

NEW COLLE-CTION 2026

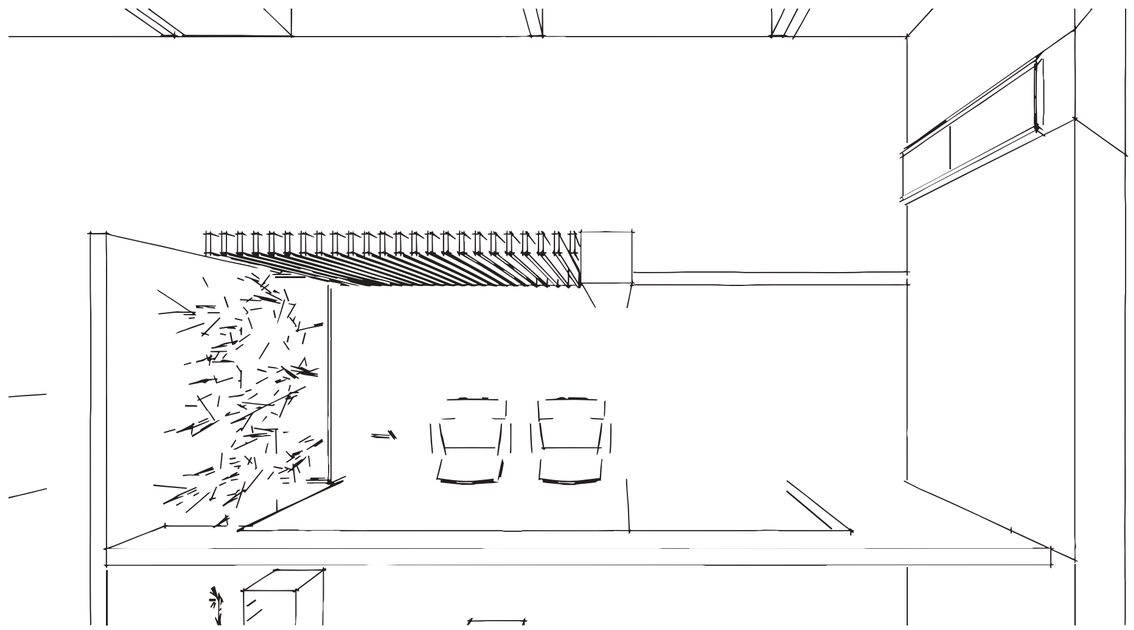

IT - Anche le tendenze estetiche seguono l'evoluzione degli stili abitativi. Toni naturali, superfici materiche, effetti tridimensionali e grandi formati dominano il mercato, accompagnati da una crescente richiesta di continuità visiva tra interno ed esterno. La possibilità di utilizzare la stessa collezione in diversi ambienti contribuisce a creare spazi armoniosi e funzionali. L'innovazione interessa anche la sicurezza e il comfort. Le superfici antiscivolo, antibatteriche e facili da sanificare rispondono alle esigenze di ambienti domestici, sanitari e commerciali, garantendo standard elevati di igiene e praticità. Il settore dei rivestimenti e dei pavimenti ceramici continua quindi a rappresentare un'eccellenza del manifatturiero italiano, riconosciuta a livello internazionale per qualità, design e capacità innovativa. In un mercato sempre più orientato alla personalizzazione e all'efficienza, la ceramica si conferma un materiale capace di interpretare le esigenze dell'architettura moderna, offrendo soluzioni che uniscono bellezza, funzionalità e rispetto per l'ambiente.

EN - Aesthetic trends in the ceramic industry reflect the evolution of contemporary living, where design and functionality go hand in hand. Natural-inspired colours, textured surfaces, three-dimensional finishes, and large-format tiles define the latest collections, designed to create elegant and seamless spaces. There is also a growing demand for visual continuity between indoor and outdoor environments, made possible by using the same ceramic collection across different settings. This approach creates harmonious, cohesive spaces with a strong visual impact.
Innovation extends beyond design to include technical performance. Modern ceramic surfaces are engineered to deliver high standards of safety, hygiene, and comfort. Anti-slip finishes, antibacterial treatments, and easy-to-clean materials meet the requirements of residential, healthcare, public, and commercial environments, ensuring durability, reliability, and long-lasting performance.
In this context, the ceramic wall and floor tile industry continues to represent one of the flagship sectors of Italian manufacturing. Its ability to combine technological innovation, outstanding product quality, and creative

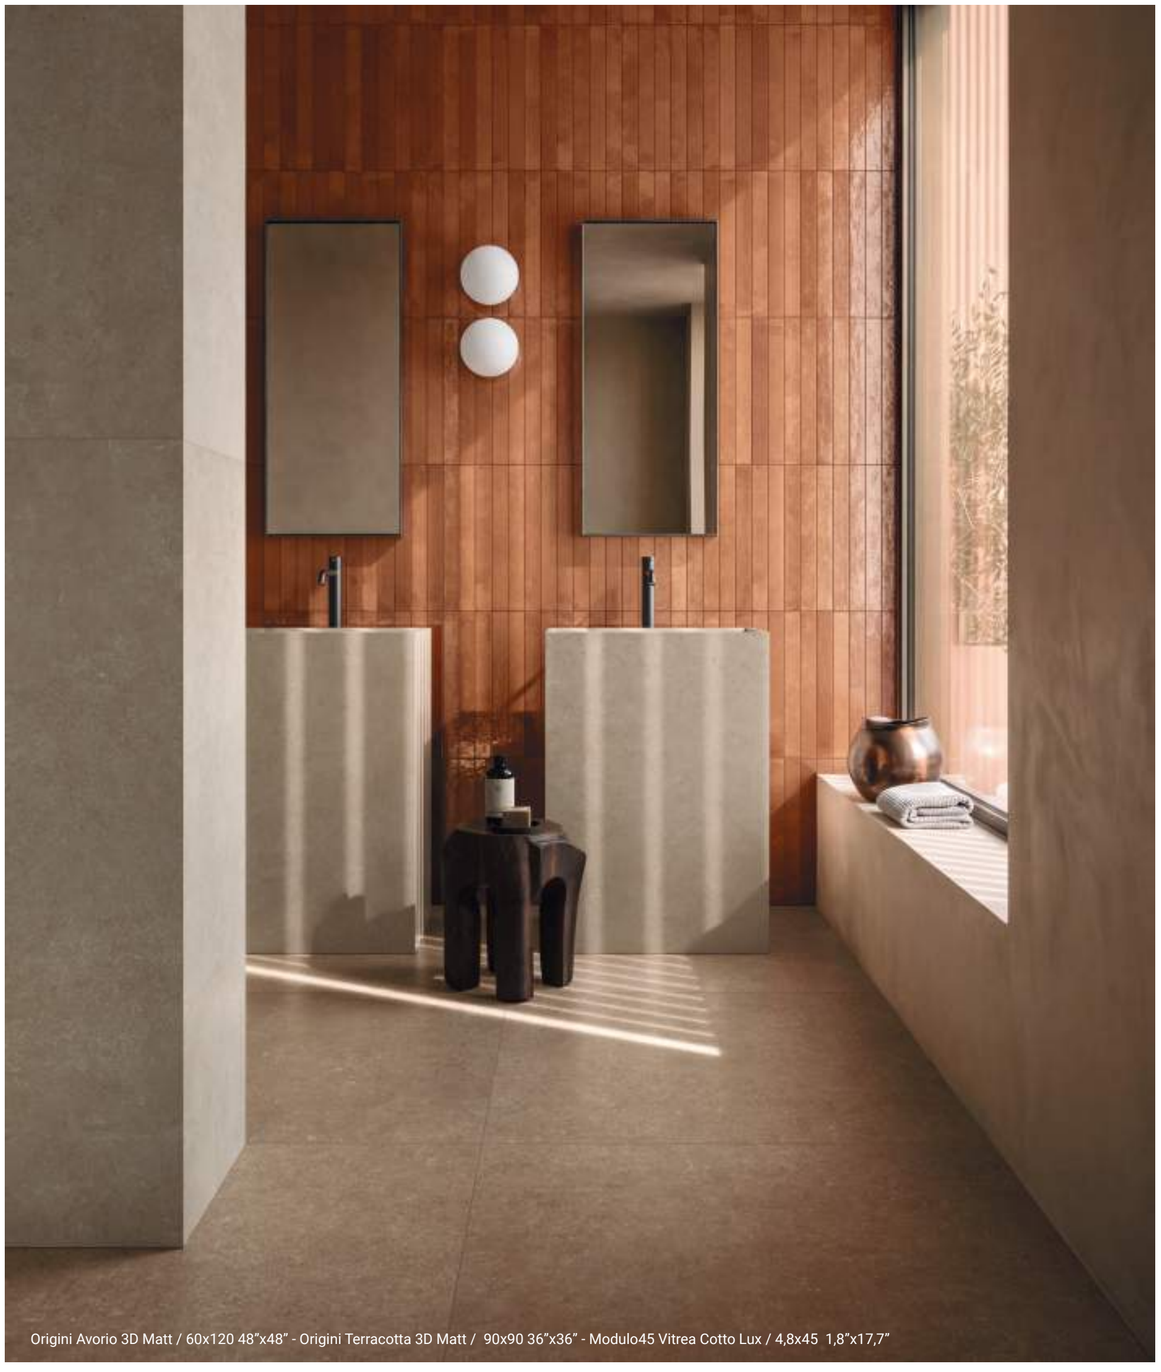

LA MATERIA DIVENTA LINGUAGGIO, LA SUPERFICIE NE È L'ESPRESSIONE: INSIEME RACCONTANO L'EVOLUZIONE DELL'ARCHITETTURA CONTEMPORANEA, DOVE TECNICA, ESTETICA ED EMOZIONE SI FONDONO IN UN'UNICA VISIONE.

MATERIAL BECOMES A LANGUAGE, AND THE SURFACE ITS EXPRESSION: TOGETHER THEY TELL THE STORY OF THE EVOLUTION OF CONTEMPORARY ARCHITECTURE, WHERE TECHNOLOGY, AESTHETICS, AND EMOTION CONVERGE INTO A SINGLE VISION.
