## IMPERFECTION FINDS ITS BALANCE

Fragments nasce dalla reinterpretazione di un ceppo siciliano, una pietra sedimentata dal tempo e ricca di inclusioni che raccontano il carattere autentico del paesaggio mediterraneo.
La collezione ne esplora la materia attraverso due differenti interpretazioni. Nella prima, la pietra si frammenta e si ricompone in una superficie ispirata al terrazzo, dove scaglie irregolari emergono da una base resinosa. La seconda introduce un effetto resina semitrasparente che amplifica profondità, luce e percezione tattile, creando un dialogo sofisticato tra materia e contemporaneità.
Fragments trasforma così la frammentazione in equilibrio compositivo e l'imperfezione in valore estetico e progettuale. Elementi diversi trovano una nuova relazione, dando vita a superfici autentiche, materiche e naturalmente irripetibili.

Fragments reinterprets a Sicilian breccia stone, shaped over time and rich in inclusions that reveal the authentic character of the Mediterranean landscape.
The collection explores this material through two distinct surface interpretations.
In the first, the stone is fragmented and recomposed into a terrazzo-inspired surface, where irregular chips emerge from a resin-based background. The second introduces a semi-transparent resin effect that enhances depth, light and tactile perception, creating a sophisticated dialogue between matter and contemporary design.
Fragments turns fragmentation into compositional harmony, and imperfection into an aesthetic and design value. Different elements come together in new relationships, creating authentic, tactile surfaces that are inherently one of a kind.
