
GENESI

IT BEGINS WITH TIME.

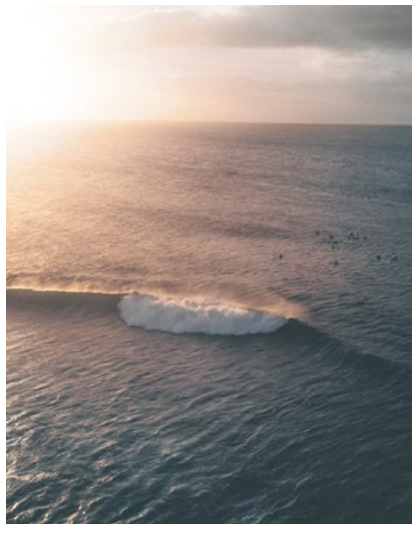

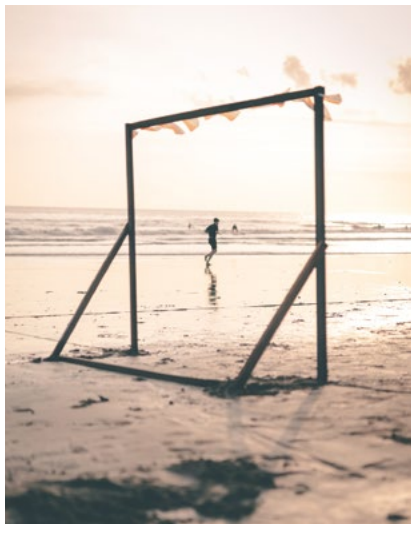

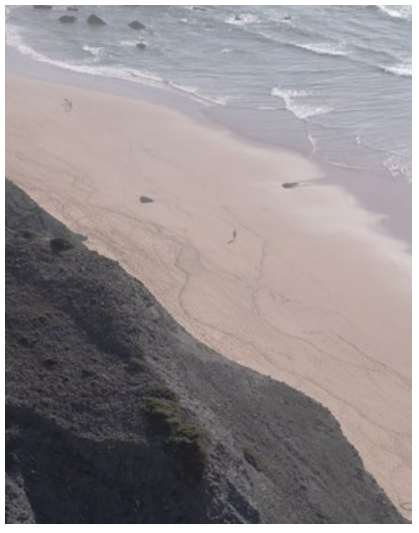

LAYER UPON LAYER.

THE SEA LEAVES ITS TRACES.

EVERY SURFACE HOLDS A MEMORY.

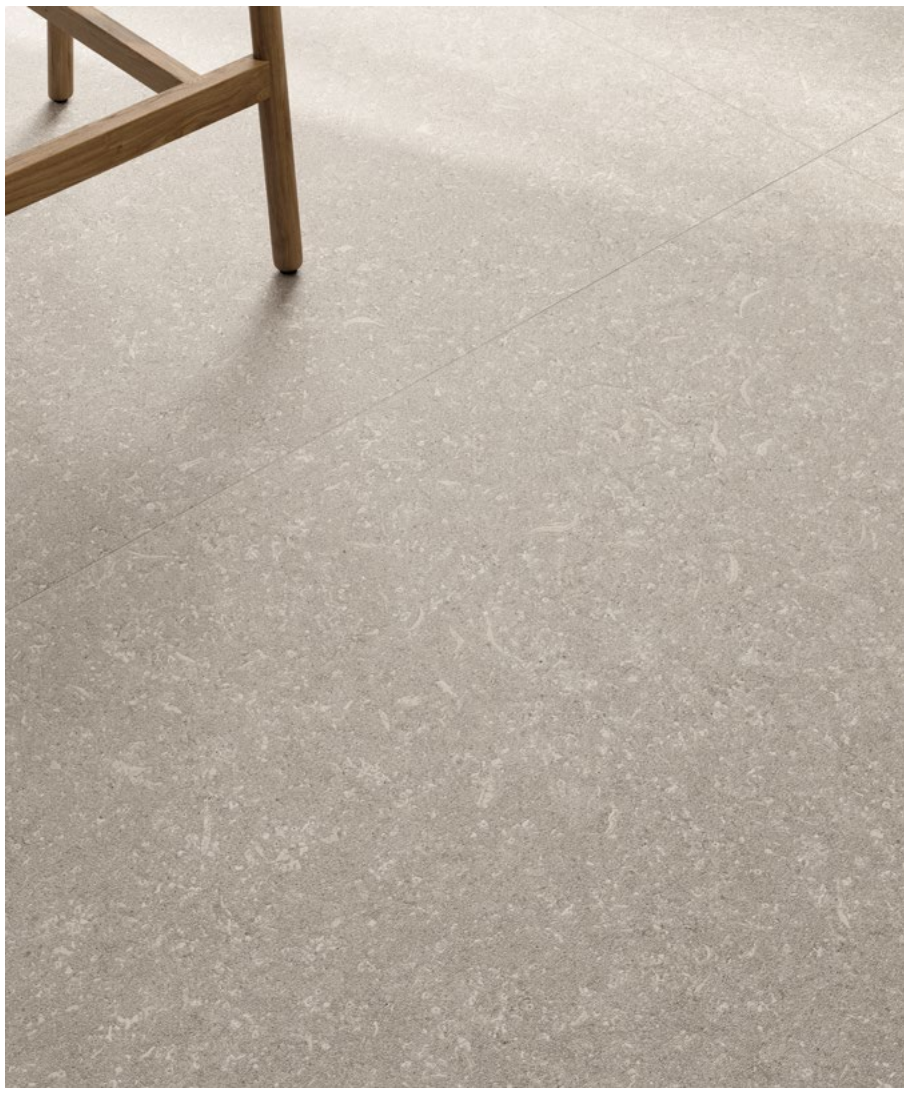

GENESI

THE MEMORY OF TIME, SHAPED INTO MATTER

Ispirata al carattere stratificato delle rocce sedimentarie, Genesi racchiude le tracce sottili dei sedimenti marini modellati dal tempo. La superficie rivela una profondità materica ricca e armoniosa, interpretata attraverso quattro tonalità naturali — Avorio, Beige, Grigio e Argilla — e due distintive proposte decorative. Tracce introduce un delicato rilievo lineare, mentre Orizzonti combina strutture differenti in un pattern variegato e ritmico. Una collezione che trasforma la memoria della natura in una superficie contemporanea, portando negli spazi dell'architettura calore, luce e un'autentica espressione della materia.

Inspired by the layered character of sedimentary rock, Genesi captures the subtle traces of marine sediments shaped by time. Its surface reveals a rich yet balanced material depth, interpreted through four natural shades – Avorio, Beige, Grigio and Argilla – and two distinctive decorative options. Tracce introduces a delicate linear relief, while Orizzonti combines different structures in a varied, rhythmic pattern. A collection that transforms the memory of nature into a contemporary surface, bringing warmth, light and an authentic expression of materiality to architectural spaces.
